this book is a study of european language translations of naxi ritual manuscripts the ritual literature of a small ethnic group living in southwest china s yunnan province the author discusses the translations into european languages in english french and german from the late nineteenth century to the second half of the twentieth century revealing a history of fragmentary yet interconnected translation efforts in the west by exploring this network he shows how translation can be understood as a metonymic recreation of textual worlds as naxi manuscripts are semi oral texts

representing an oral formulaic tradition their translation involves a metonymic relay of partial incorporations from manuscript image to reading spoken language therefore the book engages in a series of textual excavations to uncover the previously occluded contemporaneous readings that would have led to the translations we can consult today particularly in an attempt to understand how the naxi literature came to be part of ezra pound s cantos scholars in the field of ethnic minority literature in china and translation studies will find this book beneficial and it will make new contributions to comparative literature between the east and west
